### **DETAILED ACTION**

1. Claims 35-80, 82-87, and 92-101 are pending. Claims 82-87 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Group II, there being no (allowable) generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed 10/01/04. Group I, claims 35-80 and 92-101 were elected with traverse in response to the Election/Restriction Requirement filed 10/01/04 and entered as Response to Election/Restriction Requirement. The traversal is on the ground(s) that with regard to further searching of the application, should such be necessary, Applicant notes that the elected claims are classified in class 705, subclass 37 while the non-elected claims are classified in class 705, subclass 80 and from a cursory review of the classification, and without expert knowledge or admission ...". This is not found persuasive because: a payment draft, a traded product and a pro-forma invoice is classified in class 705, subclass 37 which is what Group I, claims 35-80 and 92-101 are directed to as far as can be determined by the Examiner and Group II, claims 82-87 are directed to an electronic printed or written bill of exchange document and manufactured traded product (electronic negotiations) classified in class 705, subclass 80. The subject matter requires a different search for Group I, claims 35-80 and 92-101 than for Group II, claims 82-87. The requirement is still deemed proper and is therefore made FINAL.

***Claim Rejections - 35 USC § 101***

Art Unit: 3624

3. Claims 35-80 and 92-101 are rejected under 35 USC 101 as non-statutory. The method claims as presented do not claim a technological basis in the body of the claim. Without a claimed basis, the claims may be interpreted in an alternative as involving no more than a manipulation of an abstract idea and therefore non-statutory under 35 USC 101. In contrast, a method claim that includes in the body of the claim at least one structural/ functional interrelationship which can only be computer implemented is considered to have a technological basis [See Ex parte Bowman, 61 USPQ2d 1669, 1671 (Bd. Pat. App. & Inter. 2001) –used only for content and reasoning since not precedential]. The preamble of claims 35, 64, 68, 75, and 101 do not recite “A computerized method” or “A computer-implemented method” to perform the method steps that follow. The body of claim 101 has “electronically sending”, “packeted electronic information”, and “an executed pro-forma invoice” would lead one to believe that the claim has technology. However, the claim language in the body of the claim does not specifically claim a machine to perform the “electronically sending”, the “packeted electronic information”, and “an executed pro-forma invoice”.
